

IN THE ABSTRACT

On a separate sheet, after page 26 and prior to page 27 of the application as filed, please insert the following abstract:

-- A coating composition comprising a mixture of a poly(vinylacetal-co-vinylalcohol-co-vinylacetate) and a poly(vinylpyrrolidone-co-vinylacetate) allows a medical device to be coated with a first layer containing a first bioactive material (such as rapamycin) and a second layer containing a second bioactive material (such as dexamethasone) for release *in vivo* at different release rates. --
